

# Top Ten Reasons to Upgrade to EMC Documentum ApplicationXtender 6.5

## 1 The ApplicationXtender 6.5 core product is more powerful than ever

EMC® Documentum® ApplicationXtender® 5.4 and 6.0 customers that upgrade to ApplicationXtender 6.5 can take advantage of the new core product by purchasing a 5, 25, or 75 concurrent user pack to receive all of these components:

- ApplicationXtender for Microsoft® Office 2007
- ApplicationXtender Software Retention Management
- ApplicationXtender Retention Management with EMC Centera®
- ApplicationXtender Media Distribution
- ApplicationXtender Web Services
- ApplicationXtender SDK, CDK, and Web Services Documentation Kit

## 2 Policy-manage content throughout its lifecycle

ApplicationXtender 6.5 customers can policy-manage important information with powerful retention management software that also provides full audit trail reporting.

## 3 Facilitate compliance with for your most sensitive information

The new ApplicationXtender 6.5 core product contains the ApplicationXtender Retention Management connector for Centera, enabling you to secure your most sensitive information on a long-term archiving platform.

## 4 Only ApplicationXtender 6.5 enables you to protect content after it exits the repository

IRM Services for ApplicationXtender applies rights management policies to any type of content (e-mails, images, etc.) in Microsoft Office or Adobe PDF format as it leaves the ApplicationXtender repository so that content can be safeguarded—even after it leaves your corporate firewall and hardware devices.

## 5 Image-enable Microsoft SharePoint like never before

The ApplicationXtender 6.5 Microsoft SharePoint® Services module now includes web parts for integration with your existing SharePoint deployments—users can access images stored in ApplicationXtender 6.5 without leaving the SharePoint interface.

## 6 Get the latest in workflow with a like-for-like upgrade

Customers on active maintenance of ApplicationXtender WorkflowXtender can upgrade to ApplicationXtender 6.5 Workflow Manager.

## 7 Add a robust capture package to your ApplicationXtender upgrade

The new ApplicationXtender 6.5 Image Capture package includes multiple intelligent capture technologies to identify and transform paper-based information entering your organization.

## 8 Use ApplicationXtender 6.5 in concert with the latest Microsoft Windows operating system

ApplicationXtender 6.5 now supports Microsoft Windows® 7 so you can enjoy faster access to information, share files more easily, and find relevant information more efficiently.

## 9 Enjoy the ApplicationXtender 6.5 usability enhancements

ApplicationXtender 6.5 is more user-friendly than ever; take advantage of intuitive new capabilities such as field masking, tiered delegated administration, the new Microsoft Silverlight® thumbnail contact sheet, and more.
